Project Name	LegalEase: AI-Powered Legal Document Generator
Maximum Marks	2 Marks

Customer Journey Map

Phase of Journey	Stage 1 Identify Need	Stage 2 Generate Document	Stage 3 Review & Download
Actions <i>What does the customer do?</i>	- Identifies the need for a legal document - Looks for a simple way to prepare it. - Selects the required document type.	- Enters party details, terms, and effective date. - Submits the information to generate the document. - AI generates the document; if AI fails, a built-in template is used.	- Reads and reviews the generated document. - Edits content using the document editor. - Previews and downloads the final document in the required format
Touchpoint <i>What part of the service do they interact with?</i>	- LegalEase home page - Document-type selection - User input form	- Document generation interface - Gemini AI service - Fallback legal templates	- Document editor - Live preview - PDF/DOCX/TXT download options
Customer Thought <i>What is the customer thinking?</i>	“Which legal document do I need?” “I want an easier way to prepare it.” “I hope I enter the details correctly.”	“The document should be generated quickly.” “Will the AI understand my requirements?” “What happens if the AI service is unavailable?”	“Does the document contain what I need?” “I should review it before using it.” “I want an easy way to edit and download it.”

Customer Feeling <i>What is the customer feeling?</i>	• Confused about where to start. • Concerned about making mistakes. • Hopeful for a simple solution.	• Interested in the AI-generated result. • Relieved when generation works. • Reassured by the fallback template option.	• More confident after reviewing the document. • Satisfied with the editing and preview features. • Convenient and prepared to download the final document.
Process Ownership <i>Who is in the lead on this?</i>	• LegalEase UI / Frontend • User • Document selection module	• LegalEase backend • Gemini AI integration • Fallback template module	• Document editor • Preview/export module • User
Opportunities <i>How can we improve this stage?</i>	• Provide clear descriptions for each document type. • Use simple labels and guided fields. • Add examples/placeholders for user inputs.	• Improve prompts for more relevant documents. • Show a clear generation status. • Display a friendly message when fallback templates are used.	• Add stronger editing tools. • Provide document summary/highlight important clauses. • Offer more export formats and a final review checklist
