

Project Initialization and Planning Phase

Date	30 September 2026
Team ID	SWTID-2026-3838
Project Title	LegalEase: AI-Powered Legal Document Generator
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) report

The proposal aims to simplify legal document preparation using Artificial Intelligence. It addresses the difficulties faced by users in understanding legal formats, preparing documents manually, and accessing suitable legal assistance. The system uses AI to understand user requirements and generate structured legal documents quickly and conveniently.

Project Overview	
Objective	The primary objective is to develop an AI-powered system that generates legal documents based on the user's requirements, reducing the time and effort required for manual document preparation
Scope	The project focuses on generating structured legal documents from user-provided information. It provides a simple interface for entering requirements, generating documents, reviewing the output, and downloading or exporting the generated document.
Problem Statement	
Description	Preparing legal documents manually can be difficult for people who have limited knowledge of legal terminology and document formats. Existing methods such as consulting professionals or searching for templates may require more time, effort, or cost.
Impact	Solving these issues can make basic legal document preparation more accessible and convenient. It can reduce manual effort and help users obtain properly structured documents based on their requirements.
Proposed Solution	
Approach	LegalEase-AI uses Artificial Intelligence to understand the user's requirements and generate an appropriate legal document. The system provides a user-friendly interface where users can enter their requirements and receive a structured document.
Key Features	- AI-based legal document generation. - User-friendly document creation. - Quick document download and export

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	CPU specifications, number of cores	Intel Core i5 or above
Memory	RAM specifications	8 GB
Storage	Disk space for application and documents	256 GB SSD
Software		
Frameworks	Python frameworks	Streamlit, FastAPI
Libraries	Additional libraries	Google Generative AI, python-docx, PyPDF2
Development Environment	IDE	Visual Studio Code
Data		
Data	Source, size, format	Legal document templates, user inputs, PDF/ DOCX/ TEXT
