

Project Initialization and Planning Phase

Date	28 September 2026
Team ID	SWTID-2026-3838
Project Name	LegalEase: AI-Powered Legal Document Generator
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

The following customer problem statements are based on the selected LegalEase ideas: AI-based legal document generation, automated legal document templates, review and summarization, and a simple user-friendly platform. These problem statements focus on the customer's point of view and describe the main challenges that LegalEase is intended to address.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A person who needs a legal document but has limited legal knowledge.	Create a legal document quickly and correctly.	Writing a legal document manually can be difficult and time-consuming.	The person may not know the proper legal structure, wording, or sections to include.	Confused and worried about making mistakes.
PS-2	A user who needs to create different types of legal documents.	Choose and prepare the appropriate legal document using a simple platform.	Finding and customizing suitable legal templates can take time.	Different documents require different structures and information.	Frustrated by complicated document preparation.
