

Scalability & Future Plan

Date	2 October 2026
Team ID	SWTID-2026-3838
Project Name	LegalEase: AI-Powered Legal Document Generator
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address
1	Limited number of users can be handled simultaneously	May affect response time when many users access the system at the same time	High
2	Limited document and data storage capacity	Large numbers of generated legal documents may require additional storage	Medium
3	Limited range of legal document types	Users may not be able to generate every type of legal document	Medium

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Designed for a limited number of users	Use scalable cloud infrastructure and load balancing to support more users
2	Data Storage	Stores a limited amount of user and document data	Use scalable cloud/database storage for managing larger amounts of data
3	Performance	Suitable for normal document-generation requests	Optimize the application and use caching and efficient processing to improve response time
4	Security	Basic security mechanisms	Implement stronger authentication, authorization, encryption, and secure data management

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 1	Improve existing document-generation features and user interface	1–2 Months	Better usability and user experience
Phase 2	Add more legal document templates and customization options	3–4 Months	Support a wider range of legal document requirements
Phase 3	Integrate advanced AI capabilities for improved document generation and suggestions	5–6 Months	Improve automation and document-generation efficiency
Phase 4	Cloud scalability, enhanced security, multilingual support, and mobile application	6–12 Months	Support larger user bases and provide wider accessibility
