Empathy Map

This empathy map describes a typical LegalEase user from four perspectives—what the user Says, Thinks, Does, and Feels—in relation to the problem addressed by the project.

SAYS • I need a legal document but I don't know how to prepare one. • I want a simple way to generate and edit the document. • I want to review the document before downloading it.		THINKS • I might make mistakes if I prepare the document myself. • The document should have the necessary legal sections and information. • I need an easy and reliable platform to create my document.
	<i>A legal Document User</i>	
DOES • Searches for suitable legal document formats or templates. • Enters the required details and terms into the platform. • Generates, edits, previews, and downloads the legal document.		FEELS • Confused when legal terminology is difficult to understand • Worried about making mistakes while preparing the document. • More confident when the document can be generated, reviewed, edited, and downloaded easily.
